

MICRONA™ Bedding Lime No Burn Stall Lime

Ultra fine Calcium Carbonate

MICRONA™ Bedding Lime is made from the highest quality, very fine, white calcium carbonate limestone. Designed to provide a safe, dry, easy-to-spread, easy on the animal option for today's producer.

Features and Benefits of MICRONA™

- **Increases sanitation**
- **Safe for calves and freshened cows**
- **Reduces odors**
- **Won't burn, easy on teats**
- **Animals can ingest without harmful effects**
- **Absorbs moisture, reduces harmful acids**
- **Double benefit when applied to fields**
- **Decreases cost by reducing bulk**
- **Half the cost of hydrated lime**
- **Easy to spread, white and bright**
- **An approved material under WSDA organic food program**

Increased Sanitation

Diseases caused by bacteria, such as mastitis, thrive in moist, dirty and low pH conditions. MICRONA Bedding Lime helps control bacteria by increasing the pH level and binding moisture.

Absorbent, Easy to Spread

The specially manufactured, high surface area of MICRONA makes it one of the most absorbent limes on the market. Non irritating, it will increase the comfort for the animal.

Reduces Odors

Lowering the amounts of harmful acids in the barn and stall can improve the respiratory and immune system health of your animals. MICRONA fine lime is a time honored, low cost approach to odor control.

Double Benefit, Reduces Cost

MICRONA Bedding Lime adjusts pH and adds soil nutrients to stall waste. When waste is applied to fields or added to compost, the very fine calcium carbonate in MICRONA goes to work again doubling the producer's benefit and saving the cost of additional lime applications.

Reduces Bulk

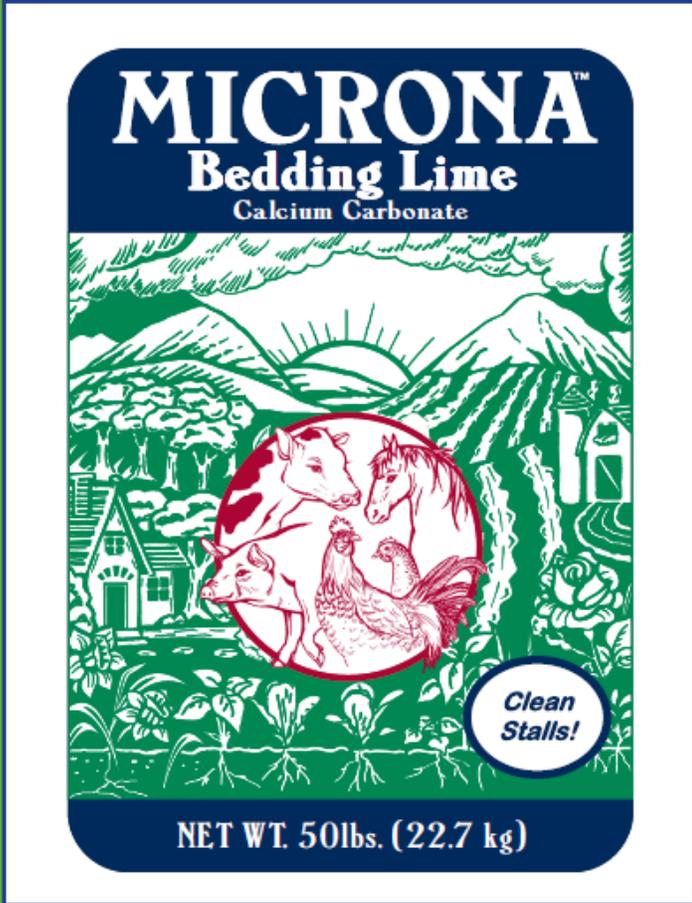

Application of bedding lime can reduce the use of other bedding material by 30%. Less bulk, less labor equals cost savings.

Organic, Wont Burn, Replaces Hydrated Lime

MICRONA™ Bedding Lime is very fine calcium carbonate with proven higher dissolution and reactivity rates when compared to other agricultural limestone products on the market today. Therefore, you can drastically reduce or eliminate the use of hydrated lime (CaO) with non-corrosive MICRONA. Hydrated lime is commonly used in stalls as bedding lime. MICRONA Bedding Lime is a new option, is an approved material under WSDA organic food program, and won't burn.

MICRONA™ Bedding Lime

MICRONA™ Bedding Lime

Ingredients: Ground Limestone

Typical Particle Size Distribution

Amount passing 10 mesh sieve: 100%
Amount passing 40 mesh sieve: 100%
Amount passing 100 mesh sieve: 99%
Amount passing 200 mesh sieve: 91%

Application Guideline

Cattle/Goats/Sheep/Horses and other large animals: 1 lb per stall every 5 to 10 days.

Hogs: 1 lb per 12 x 12 stall every 5 days; Piglets: 3 oz. per day per piglet (keeps piglets drier).

Rake off contaminated bedding as needed.
